TANKLUX

TANKLUX

Tanklux is a family owned and managed business established in 1966 and is run by the 2nd generation of the Bollaert family. With 13 employees from the Grand Duchy and the region, Tanklux offers storage and transshipment services for petroleum products in the port of Mertet.

FIRE FIGHTING FOAM CONVERSION RETHOUGHT

In the course of converting fire fighting systems to fluorine-free foam agents, we use our expertise and provide our customers with the best possible support.

Together with our customer we work to develop sustainable solutions.

The challenging issue of PFAS cleaning often leads to the replacement of the storage container in stationary systems for economic reasons. Purchasing new containers makes particular sense if the old ones cannot be cleaned properly or the WHG (laws on drinking water protection) or storage requirements are no longer met.

Tanklux chose an insulated and heatable stainless steel tank container as a storage tank, which we already filled in Hamburg with the high-performance foam agent vaPUREx®, which is produced without PFAS. Through precise coordination between Tanklux, the freight forwarder and our team, a tight schedule was adhered to and the fire fighting system could be converted on time.

We often deliver the foam concentrates in tank trucks or in IBCs, which are then transferred to the already installed tank on site.

By jointly developing needs-based solutions, we can support our customers quickly and easily in conversion projects such as Tanklux's.

Please feel free to find out more about our solutions for all aspects of fluorine-free fire extinguishing foam agents.

vaPUREX® AR 3/3 F-5 #8343

3% proportioning rate for polar and non-polar flammable liquids

EN 1578:2018 parts 1, 3 and 4

FM, VdS approval and ICAO Level B

Main applications: chemical and petrochemical industries, the aviation sector as well as in marine on- and offshore areas

vaPUREX® FXS AR 3/3 F-0 #2365

3% proportioning rate for polar and non-polar flammable liquids

EN 1568:2018 parts 1, 3 and 4

FM and VdS approvals pending

Main application: fixed fire fighting systems
