INGREDIENTS NOT CLASSIFIED AS HAZARDOUS SUBSTANCES: The substances in the mixture do not meet the PBT/vPvB criteria according to REACH, annex XIII. The data refer to the product as delivered. The solutions for use produced according to dilution recommendations are to be classified differently. Can harm the aquatic fauna when entering surface waters. Can harm the bacteria population in waste water treatment plants when entering the sewerage system. Breathing is not possible whilst submerged in the foam. Take care when spraying people! Concentrated surfactant solutions always pose a danger to aquatic life because they greatly reduce the surface tension of water thus disrupting all life processes associated with it. In sewage treatment plants, for example, the necessary aeration of the sewage stages can be hindered by the strong foam formation.
